app page 1

app opened as widget area

when apps are opened as a widget, they will go to this area. widgets are layerable, and the user can open as many as they please. If cluttered, the user can also minimize apps out of view and reopen them from the open apps menu.

got it

layerable items

nura

playground

all open apps

when apps are opened full screen, or large, they will be moved to the playground page, swipable to the right from anywhere in the interface. good for if the user just wants a blank page with their apps open on it. these will be non-layerable
